

afficher\_inventaire

afficher\_inventaire  
\_manette

afficher\_textures\_sac

```
graph LR; A[afficher_inventaire] --> C[afficher_textures_sac]; B[afficher_inventaire_manette] --> C;
```

The diagram illustrates a functional dependency. Two functions, 'afficher\_inventaire' and 'afficher\_inventaire\_manette', are shown on the left, each enclosed in a red rectangular border. Blue arrows point from the right side of each of these boxes to a single box on the right labeled 'afficher\_textures\_sac'. This target box has a gray fill and a black border. The arrows indicate that both functions serve as inputs or dependencies for the 'afficher\_textures\_sac' function.
